Education

Bachelor of Science (CS)   **2020-2024**

Sarvodaya Mahavidyalaya, sindewahi.

Gondwana Univesity, Gadchiroli (CGPA- 7.6)

Projects

Movie App / React.js, Tailwind CSS, Redux, TMDB API

- This is a fully responsive Movie Application which contains a list of movies, tv shows from the cloud sorted based on the most popular filter. User can change filter (trending, popular, rated, and preferred language) & users can see the movie details, trailers, reviews, by clicking on the movie, tv shows they like on the home screen.
- Designed and deployed a scalable real time data using TMDB API.
- Implemented a search feature for user experience so a user can filter movies, tv shows according to their choice.

- **Github Link** : Cinevortex

E-Commers App / React.js, Tailwind CSS, Redux, Context API

- Developed full-stack e-commerce platform using React.js, Redux Toolkit, and Firebase, featuring a responsive UI, secure authentication, and real-time cart management.
- **User Authentication :** Firebase-powered signup/login with role-based access b (admin/user).
- **Product & Order Management :** Admin dashboard for CRUD operations on products and order tracking.
- **Shopping Cart :** Redux Toolkit - driven state management for seamless add/delete/update cart actions.
- **Database & Storage :** Firestore for real-time product/order data and Firebase Storage for scalable media handling.
- **Responsive Design :** Mobile-friendly interface with search and category filters.
- **Project Link :** Ecommers App
- **Github Link :** Ecommers
